I am so sick of people trying to regulate what we can and cannot listen to. That is the whole reason why I purchased my satellite radio- so I can listen to music, news, weather, traffic issues whenever I want to. I refuse to listen to public airwaves anymore. All of the censorship and people trying so hard to be politically correct- it is really getting out of hand. It is bad enough that I now have to PAY for my radio, but now the politicians are trying to invade this sect too. Why doesn't government concentrate our tax dollars on something that can make a difference in people's lives like health care issues or the physicians malpractice suits driving out thousands of quality doctors? Leave our free speech remain free speech- not censored by beaurocrats.
